

# MEDIA ADVISORY Port of Miami Tunnel Project

March 13, 2007, 5:00 P.M.

## TUNNEL PROPOSERS SUBMIT MASSIVE PROPOSALS

Three proposals filling 70 crates, boxes and trunks were recently delivered to the Florida Department of Transportation by teams competing to design, build, finance, operate and maintain the Port of Miami Tunnel Project. Each response to the Request for Proposals filled nearly a truck or van and was received by the 2 p.m. deadline on March 5, 2007. Stacked in a secure storage area, the reams of technical and financial documents measured approximately four feet high and 18 feet across.

The proposers are FCC Construcción/Morgan Stanley, Miami Access Tunnel and Miami Mobility Group. Their submissions are now being reviewed by expert panels, which will report findings to the Selection Committee. The winning bidder is expected to be determined on April 16, 2007.
